SUMMARY

Data Analyst with an M.Sc. in Economics, specializing in leveraging advanced analytics to drive strategic business decisions and optimize performance. Proven ability to transform complex datasets into actionable insights, evidenced by identifying key revenue drivers across \$12.63M in sales and delivering 6 actionable business insights for category investment and Q4 planning. Adept at predictive modeling, statistical analysis, and developing KPI dashboards to enhance operational efficiency and support data-driven growth initiatives.

SKILLS

Programming & Analytics: Python (Pandas, NumPy, Matplotlib, Scikit-learn), SQL (Joins, CTEs, Window Functions)

BI & Visualization: Power BI (DAX, Data Modeling), Excel (Power Query, Pivot Tables, XLOOKUP, Forecasting)

Data & Statistical Analysis: Data Cleaning, EDA, Data Validation, Statistical Analysis, Statistical Machine Learning, Regression, Predictive Modeling, Hypothesis Testing, A/B Testing, Data Governance

Tools: MySQL, VS Code, MS Office, Microsoft Copilot, GitHub Copilot, NotebookLM, Claude

EXPERIENCE

Career Context: Pursued M.Sc. in Economics (Sep 2024 – Sep 2026) while gaining hands-on industry experience through internships.

Data Analyst Intern | Primeor Solutions

Aug 2026 – Sep 2026

- Built an analysis-ready dataset from multidimensional 51K+ e-commerce records spanning 796 customers and 147 countries, removing 54 duplicates and standardizing key fields, using Excel and Power Query.
- Identified key revenue and profitability drivers across \$12.63M in sales and \$1.47M in profit using MySQL, finding Technology at \$65.46 average profit/order and Furniture at 17% average discount to inform category investment and margin optimization.
- Delivered a 3-page Power BI dashboard and a business report with 6 actionable business insights, translating analysis into recommendations on key-account retention, APAC/EU market focus, Q4 inventory and marketing planning, and loss-making orders.

Digital Marketing Intern & Team Lead | Ranam Business Consultants Ltd.

May 2025 – Aug 2025

- Assessed campaign and LinkedIn performance metrics to identify factors driving engagement and click-through rates, using the insights to refine content strategy and contributing to a ~25% increase in CTR and 40%+ hike in audience engagement within 8 weeks.
- Established and maintained campaign reporting trackers to standardize performance monitoring across multi-geographical, cross-functional teams, improving reporting accuracy and contributing to a 40%+ increase in participation rates.
- Led onboarding and training of new team members, providing guidance on reporting and content processes to reduce workflow friction.
- Presented updates and data-driven insights directly to executives, including the Founder, highlighting areas for strategic improvement.

PERSONAL PROJECTS

Tools Used: Excel, Python, MySQL, Power BI

- FP&A Variance Analysis & Forecast** — Created category-specific budgets from prior-year sales, uncovering a ~7% variance on \$1.8M actuals vs. \$1.7M budget and forecasting 3 months ahead, highlighting scopes for variance-based early-warning monitoring.
- Facebook Ads Campaign Efficiency Analysis** — Analyzed 1,143 ads across 3 campaigns, identifying budget inefficiency in Campaign 1178, where 94.82% of spend generated 80.82% of conversions, exposing the need for funnel- and segment-level budget evaluation.
- Customer RFM & Retention Analysis** — Segmented ~1M retail transactions using RFM/cohort analysis, finding Champions generated 89.9% of revenue while Month-1 retention fell to 37.5%, signaling opportunities for high-value customer retention and re-engagement.
- Indian 2024 Car Market Sales Analysis & Q1 2025 Forecast** — Analyzed 2024 Indian passenger-car sales across 14 brands, finding Maruti at 40.90% market share, then built Q1 2025 polynomial forecasts as a directional baseline for brand- and segment-level planning.
